# Introduction

The PingFederate Agentless Integration Kit includes the ReferenceID Adapter, which allows developers to integrate applications with a PingFederate server acting as either an Identity Provider (IdP) or a Service Provider (SP). The ReferenceID Adapter allows an IdP server to receive user attributes from an IdP application. On the SP side, the adapter allows an SP application to receive user attributes from the SP server.

The ReferenceID Adapter does not require the application to include *agent* PingFederate software libraries to interact with the Adapter. Instead, user attributes are passed via direct HTTP calls between the application and PingFederate.

## Known Issues

See the *Qualification Statement* in the `/docs` directory for additional information.

## Notes

For information on features, installation, and setup, please refer to the *Agentless Integration Kit User Guide* located in the `/docs` directory of this distribution.

If you have problems with deployment, installation, or configuration, please contact our support team at [support.pingidentity.com](https://support.pingidentity.com).
